Importance of feedback of teachers from students

Education is the most important part of one's life. The kind of education one receives largely depends upon the kind of teacher one has.

A competent teacher is supposed to possess the following characteristics

- A Good Listener and Good learner
- Good Sense of Humor.
- Kindness.

To improve students' performance, it is essential that they should understand the concepts related to the subject clearly. This can be achieved through effective teaching and by establishing good rapport between students and teachers so that they feel free to ask their difficulties. It is necessary to know if they are facing any difficulties.

It is important to know students' expectations from teachers as well as the performance of the teacher from student's point of view. Therefore, the feedback is an essential part of effective learning. To improve the quality of teaching, it is essential to collect feedback of teachers from students.

Considering all the above aspects, a feedback form is prepared and at the end of each academic session, after completion of the course, each department collects feedback of the teacher from students.

Procedure to calculate percentage score

To assess the individual teacher's performance, feedback was collected from the students during the academic session 2022-2023. Students were asked to fill up the feedback forms and rate the performance of their teacher on eight parameters (mentioned in the Google feedback form), on a four point scale (as shown in the table below) and give their opinion by putting a tick mark in front of the box provided against each parameter. They were also free to give their suggestions and opinion in the space provided in the form.
