# Activated Charcoal for Environmental Sustainability

**Shraddha Sharma, PhD** – Associate Professor, Department of Engineering Chemistry, Lakshmi Narain College of Technology, Madhya Pradesh, India

**Series:** Air, Water and Soil Pollution Science and Technology; Environmental Research Advances

**BISAC:** NAT011000; SCI026000; TEC010010

**DOI:** <https://doi.org/10.52305/PJPJ7248>

Activated Charcoal has proved to be one of the most promising environmentally sustainable material for air, water, and soil remediation. Recently, activated charcoal has also been explored for its use in several other domains including its medicinal benefits. Its superior performance as an adsorbent for controlling contamination and recovery of important resources has led to the augmentation of its applications across industries around the world. Activated charcoal is used in water treatment plants for the exclusion of organic compounds, color, odour, synthetic chemical compounds and antibiotics from wastewater. It proves to be a futuristic substance in terms of health, resources, economy and environmental sustainability.

This book presented focuses on the feasibility of the use of activated charcoal for catering to several environmental problems, treatment of contaminants in the environment, medical and biomedical industry, including its use in cosmetics. This publication is an attempt to assemble the reported innovative methods adopted using activated charcoal, applications of activated charcoal, along with the available patent studies and research analysis on the material. This book predominantly proposes activated charcoal as a solution to the environmental challenges encountered around the world. This work will help readers understand, appreciate and recognize the wide spectrum utilization of activated

charcoal in today's context. The content of this book will facilitate the development of innovative strategies and future research directions to attain sustainability, with the use of this material. The book will be beneficial to scientists, engineers, chemists and researchers in the academic and industrial fields.

# Table of Contents

## Preface

## Acknowledgement

### Chapter 1. The Benefits and Uses of Activated Charcoal for Environmental/Human Protection and Remediation

Nidhi Jain

Department of Engineering Science, Bharati Vidyapeeth's College of Engineering, Lavale, Pune, Maharashtra, India

### Chapter 2. The Use of Activated Carbon for Wastewater Management

Mohini S. Gupte and Madhuri S. Kulkarni

Modern College of Arts, Science, and Commerce, Ganeshkhind, Pune, Maharashtra, India

### Chapter 3. The Use of Activated Charcoal for Environmental Protection and Remediation

Smita Jadhav<sup>1</sup>, Prashant Mahajan<sup>2,3</sup> and Trupti Lade<sup>4</sup>

<sup>1</sup>Bharati Vidyapeeth's College of Engineering for Women, Pune, Maharashtra, India

<sup>2</sup> Research Scholar, Symbiosis Institute of Technology Symbiosis International (Deemed University) (SIU), Gram: Lavale, Tal: Mulshi, Pune, Maharashtra, India

<sup>3</sup>Assistant Professor, Department of Engineering Sciences, AISSMS Institute of Information Technology, Savitribai Phule Pune University, Pune, Maharashtra, India

<sup>4</sup>Gahlot Institute of Pharmacy, Koparkhairane, Navi Mumbai, India

### Chapter 4. Innovation Trends in Wastewater Treatment with a Focus on Patented Technologies Related to Activated Carbon

Amit Kumar Tiwari<sup>1</sup>, Ram Lal Verma<sup>2</sup>, Sayali Apte<sup>3</sup>, Sameer Choudhary<sup>4</sup> and Sapna Shinde<sup>5</sup>

<sup>1</sup>Patent Department, R.K. Dewan & Co., Pune, Maharashtra, India

<sup>2</sup>Air Pollution Cluster, Regional Resource Centre for Asia and the Pacific, Asian Institute of Technology, Pathum Thani, Thailand

<sup>3</sup>Department of Civil Engineering, Symbiosis Institute of Technology (SIT), Symbiosis International (Deemed University) (SIU), Pune, India

<sup>4</sup>Rabindranath Tagore University, Raisen, Distt Raisen, Madhya Pradesh, India

<sup>5</sup>Symbiosis International (Deemed University) (SIU), Pune, Maharashtra, India

### **Chapter 5. The Removal of Toxic Heavy Metal Ions from Synthetic Wastewater by Bio-Waste Orange Peel Activated Carbon**

Santosh D. Ashtaputrey<sup>1</sup> and Prashant D. Ashtaputrey<sup>2</sup>

<sup>1</sup>Department of Chemistry, Government Science College, Gadchiroli, Maharashtra, India

<sup>2</sup>Department of Chemistry, Institute of Science, Nagpur, Maharashtra, India

### **Chapter 6. Coconut Shell-Based Activated Carbon: Synthesis and Adsorptive Properties**

Aiman Hakim Supee and Muhammad Abbas Ahmad Zaini

Centre of Lipids Engineering and Applied Research (CLEAR), Ibnu-Sina Institute for Scientific and Industrial Research, UTM Johor Bahru, Malaysia

### **Chapter 7. The Adsorption of Phenol and Bisphenol A (BPA) Using Activated Carbon**

Aiman Hakim Supee and Muhammad Abbas Ahmad Zaini

Centre of Lipids Engineering and Applied Research (CLEAR), Ibnu-Sina Institute for Scientific and Industrial Research, UTM Johor Bahru, Malaysia

### **Chapter 8. Charcoal Production from *Acromonia Aculeata* (Macaúba) and Its Impact on the Environment**

Sandro L. Barbosa<sup>1</sup>, Milton de S. Freitas<sup>1</sup>, Natália de Souza Freitas<sup>1</sup>, David L. Nelson<sup>1</sup> and Stanley I. Klein<sup>2</sup>

<sup>1</sup>Department of Pharmacy, Federal University of the Jequitinhonha e Mucuri Valleys – UFVJM, Diamantina, Minas Gerais, Brazil

<sup>2</sup>Department of Analytical, Physical and Inorganic Chemistry, Institute of Chemistry, State University of São Paulo – Unesp, Araraquara, São Paulo, Brazil

### **Chapter 9. Persulfate-Activated Charcoal Mixture: An Efficient Oxidant for the Decolorization of Rhodamine-B in Water**

Palani Natarajan

Department of Chemistry and Centre for Advanced Studies in Chemistry, Panjab University, Chandigarh, India

## **Chapter 10. The Conversion of Scrap Tyres into Activated Carbon Black**

Arun Kumar Wamankar

Lakshmi Narain College of Technology, Bhopal, India

EDITED BOOK

NANOCELLULOSE: A FASCINATING, MULTIFUNCTIONAL AND SUSTAINABLE BIOMATERIAL

Book Name: Futuristic Trends in Chemical Material Sciences & Nano Technology Volume 3 Book 18

Authors: Shubhangi P Patil, Rajendra R Tayade, Aniruddha B Patil

Keywords: Nanocellulose, tuneable chemistry, Surface modification, applicability of NC

Area/Stream: Chemical Science,Material Science & Nano Technology / Nanotechnology / Others

Published in: IIP Series

Volume: 3, Month:May,Year:2024

Page No.: 571-586

e-ISBN: 978-93-5747-640-9

DOI/Link: <https://www.doi.org/10.58532/V3BDCS18CH43>

Abstract:

Nanocellulose is a remarkable natural polymer that is prevalent on the planet. It demonstrates incredible contemporary needs for sustainability, biodegradability, diverse functionality, tuneable chemistry, and renewable resources. Nanocellulose may be extracted chemically or mechanically from a variety of natural sources, such as rice husk and sugarcane. This chapter discusses numerous cellulose sources, nanocellulose types and extraction procedures. In this study, we concentrated on the chemical modification of nanocellulose to impart or improve certain specifications to the material based on its application. With several current research examples, we show the application of nanocellulose. We cover nanocellulose applicability in packaging, bio-medical, environmental remediation, energy harvesting, and electronics. Finally, we provide a critical viewpoint on the future of nanocellulose in the context of innovative, eco - friendly and sustainable materials.

IIP Series is an online, open-access, peer-reviewed, interdisciplinary Journal. IIP Proceedings provides a comprehensive solution for conferences and edited books that cover research topics across various scientific, technical, and medical disciplines. It aims at disseminating high-level research results and developments to researchers and research groups. It mainly focuses on presenting practical solutions for the current problems in Applied Sciences and Applied Social Sciences.

### Abstract

Chemical, Material Sciences & Nano technology book series aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results on all aspects of Chemical, Material Sciences & Nano technology. The field of advanced and applied Chemical, Material Sciences & Nano technology has not only helped the development in various fields in Science and Technology but also contributes the improvement of the quality of human life to a great extent. The focus of the book would be on state-of-the-art technologies and advances in Chemical, Material Sciences & Nano technology and to provides a remarkable opportunity for the academic, research and industrial communities to address new challenges and share solutions.

## TRENDS AND ADVANCES IN HAZARDOUS WASTE DISPOSAL TECHNIQUES IN INDIA

February 2024

● Vinod Kumar · Richa Singh · ● Shalini G Pratap · ● Pramod Kumar Singh

Hazardous waste disposal is a global issue that requires ongoing innovation and adaptation to solve environmental issues. This chapter examines the most recent developments and trends in hazardous waste disposal methods in relation to India. The chapter provides a comprehensive overview of the evolving strategies for managing hazardous waste in an environmentally conscious and sustainable ... [\[Show full abstract\]](#)

## Abstract

The effect of chemisorption of molybdenum atom (Mo) on single walled (8, 0) zigzag carbon nanotube (CNT) is studied with band structure, density of state, charge transfer, charge isosurface and HOMO–LUMO molecular orbitals. The binding energy of chemisorption of molybdenum atom on carbon nanotube is found using band structure and density of state. The molybdenum is strongly chemisorbed on carbon nanotube with binding energy range from 0.196 to 0.906 eV. The band structure and density of states clearly illustrates the creation of extra states and reduction in the band gap. The amount of charge transfer is found using mulliken population analysis and it is in the range from 0.508 to 0.603 electron depending upon site of chemisorption. The nature of bonding between molybdenum atom and carbon atom of carbon nanotube is explained with molecular orbitals and the charge density analysis. It shows the formation of sigma bond between Mo and carbon atoms.
